CHRONOGRAPH WATCHES,
OF A NEW AND IMPROVED SYSTEM.

WE have just received a consignment of NEW RACE OR CHRONOGRAPH WATCHES which for durability, accuracy, precision, and convenience leave nothing to be desired.

The Chronograph hand is in front of the watch over the hour and minute hands. The cases are extra strong, with a solid cover on the back and a glass inside to protect the work.

The general objections to the Chronographs with second hand and glass on the back were that those glasses often broke, and each time necessitated a cleaning ; that the glasses did not thoroughly protect the works from dust ; and that to move the regulator it almost required the help of a watchmaker.

All these serious drawbacks of an otherwise good watch have been avoided in the construction of our new and improved Chronograph watches

MACLEAN'S GUIDE to BOM

COMMERCIAL INTELLIGENCE

THURSDAY EVENING, AUGUST 23.

INDIAN SECURITIES are quoted rather higher on the London Stock Exchange. The 3½ per cent. Sterling Loan is now worth £102⅜, an advance of ⅛; Four per cent. rupee paper, £80⅞; 4½ per cent, £84. No change in Consols or Bank Stock. There is no alteration in the value of money. In the General Produce markets, Linseed is strong, Bombay on the spot and to arrive being worth 44s. per quarter; Rapeseed unchanged; Wheat dull. Reuter quotes No. 1 Soft White to arrive 8s. 8d. per cental Liverpool, cost, freight, and insurance terms.

The Manchester Market is quiet.

The Liverpool Cotton Market yesterday closed steady for Americans; Surats firm; arrivals inanimate. Spot prices are without change. In New York ready cotton is unchanged, but futures for the month of November are one point higher, the closing price being 10·07. The figures to date are given below :—

	1883.	1882.	1881.
Total receipts up to Tuesday....	5,949,000	4,649,100	5,778,500
Wednesday's receipts	1,000	1,000	5,200
Total since 1st Sept.	5,950,000	4,650,100	5,783,700

EXCHANGE.—Reuter now reports Bar Silver worth 50⅝d. per oz., being the price named in private messages some days ago. The special shipments of the week consist of £100,000 in Silver and £40,000 in Gold to this port. The demand for remittance to the East continues, and the Council drawings meet with a ready sale. The total sold during the week ending on Tuesday aggregates 36 3-10 lakhs. At the biddings yesterday, twenty lakhs of telegraphic transfers were taken up for Calcutta at 1s. 7½d., and 7½ lakhs of transfers and Rs. 50,000 in ordinary demand on Bombay at the same figure. The market here opened steady, ready Bank Demand Bills being obtainable at 1s. 7 9-16 while buyers asked 1s. 7 27-32d. for three months' credits. There are, however, very few merchants' bills making, in consequence of the fall in the export trade. At the close the feeling is rather weak. Calcutta unaltered.

Bank Bills on Demand	1s. 7 9-16d.
Do. Telegraphic Transfer ...	1s. 7¾d.
Do. three months' sight	1s. 7¾d.
Credits, do. do. ...	1s. 7 27-32d.
Francs do. do. ...	Fcs. 2·09½.

GOVERNMENT PAPER closes weak, although quotations are unchanged. 4 per cents., Rs. 99⅝; 4½ per cents., Rs. 104.

SHARES.—Bank of Bombays are in good request at the advanced rate of Rs. 755. In press companies Berars have risen to Rs. 622½; but Forts have fallen to Rs. 2,925. Mill shares continue firm at a further advance in values. Some Alliances were done at Rs. 965; Bombay Uniteds at Rs 1,060; Central Indias at Rs. 750; Dhurrumseys at Rs. 695; Empress at Rs. 895, ex. div.; Framjee Petits at Rs. 975; Hyderabads at Rs. 1,310; Jewraz Baloos at Rs. 1,255; Madras Uniteds at Rs. 3,000, ex. div.; Mahalukshmis at Rs. 1,075; Manockjee Petits at Rs. 1,450; Morarjees at Rs. 1,580; Nationals at Rs. 1,070; New Great Easterns at Rs. 1,125; Sholapores at Rs. 1,600, and Western Indias at Rs. 1,070.

There is a good inquiry for Bombay and Burmah Trading shares, and they have risen to Rs. 3,975 for the original and Rs. 800 for the second issue. Kemp and Treacher and Companies' shares are in demand at the respective rates of Rs. 300 ex. div. and Rs. 1,170.

COTTON.—The market is rather steadier, and some sales of Oomrawuttee are reported at our quotations. The local demand continues on a restricted scale. Prices show no change. We quote :—

RAPESEED.—Very little doing; prices to some extent nominal.

WHEAT continues quiet. Only Luskari and Yellow sorts are inquired for to a moderate extent, and prices are slightly lower. We quote :—Rs. 32 to Rs. 32½ per candy for White Pessie, No. 1; Rs. 28½ to Rs. 29 for Yellow; Rs. 27 to Rs. 27½ for Luskari; and Rs. 24½ for Catha.

FREIGHTS are weak. Liverpool *vid* Canal, 25s. for measurement; Wheat, 23s. 9d. Trieste, early next month, Rs. 15; Venice, Rs. 12½.

PIECE-GOODS.—The tone of the market is better in consequence of the improvement in the agricultural prospects in the chief consuming districts. At the present time, however, excessive stocks prevent any advance in prices.

DEFECTIVE OR FAILING SIGHT.

THE sense of sight is so valuable that the importance of perfect and carefully adjusted spectacles can scarcely be overrated ; although the wearing of single eye-glasses should be strictly avoided, we have the highest medical authority, confirmed by daily experience, that imperfect glasses, together with the haphazard plan of selection generally employed, are frequent causes of irremediable injury to the sight ; and as no present economy can compensate for such a loss, it behoves all to be cautious how they are tempted to use the common pebble or glass spectacles now so generally sold.

For the guidance of those who are using pebble spectacles, it may be stated that when the pebbles are cut *against* the grain, and not polished on the principle which has been universally declared the most appropriate, based on scientific research, they are injurious to the sights.

Unadvisable as the unnecessary wearing of spectacles undoubtedly is, the common notion that their use should be postponed to the utmost is proved beyond dispute to be a grave mistake.

Being in possession of all the optical instruments taken over by us from Dr. A. Menist, we are not only in a position to suit the eye sight to perfection, but to supply different accommodations for each eye which so frequently are needed.

TELEGRAMS.

THE OPINIONS ON THE JURISDICTION BILL.

(FROM OUR SPECIAL CORRESPONDENT.)

SIMLA, AUG. 23.

THE opinions of local Governments and officers on the Jurisdiction Bill are now on the way to England, and will arrive in a fortnight. They are so voluminous (numbering three thousand pages) that it will be impossible to digest and discuss them this session.

The delay has resulted from a desire to send them in a complete form, and was not a strategem of the Government of India, as is asserted. This Government were anxious to facilitate discussion in Parliament, and offered to send the opinions as they came in; but the Home Government said that course would be useless and unsatisfactory, and the opinions must be published all together. The instant all were received they were forwarded.

The statement that they represent a unanimity of opinion against the Bill is erroneous. The majority of the local Governments are against its withdrawal.

The Assam authorities recommend its withdrawal, but only in defereuce to the feeling aroused by the agitation, the Commissioner, Mr. Elliott, being still favourable to its principle.

The Hon'ble Rivers Thompson, Lieutenant-Governor of Bengal, urges its withdrawal; but Sir James Ferguson, Governor of Bombay, Mr. Grant Duff, Governor of Madras, Sir Charles Aitchison, Lieutenant-Governor of the Punjab, Sir Alfred Lyall, Lieutenant-Governor of the North-West Provinces, and Mr. Britain Jones, Commissioner of the Central Provinces, are against its withdrawal.

The High Court Judges are divided. Those of Bengal are nearly unanimous against the Bill, while those of Bombay are in favour of the principle of the measure.

The opinions of the lesser officials are generally against the Bill, but there are many exceptions.

The Calcutta opponents of the Bill, in asking for a postponement of its consideration by the Legislative Council till the House of Commons considers these opinions and discusses them, are taking a course of doubtful wisdom. If the measure be dealt wi th by this Government now, it is almost certain that considerable modifications will be accepted. If Parliament, by a vote, approves of the Bill, it will probably be passed substantially as it stands. The movement for postponement is based on a misapprehension as to the unanimity of the opinions submitted, and of the real tendency of the political forces at home. The statement reiterated by the *Times*' Calcutta correspondent, that all India disapproved of the Bill, was accepted as approximately true, but was disregarded. A Liberal majority is ready to vote for it; the Conservatives are not unanimous against it, and, foreseeing an overwhelming defeat, brought strong pressure to bear on Mr. Ashmead-Bartlett to induce him to follow the example of Mr. Stanhope, and drop the matter. He was obdurate, and a count-out was arranged by the Conservatives, and acquiesced in by the Government, who wished to avoid a protracted debate while the business of the session was in arrears. Lord Kimberley's answer to the deputation was given in full knowledge of the opinion of the House in favour of the Bill. There is no reason whatever to suppose that this opinion will undergo change by next February or March. The inevitable result of a decisive majority in favour of the Bill will be that it will become law without any material alteration. It seems scarcely worth while to keep India simmering in agitation for another year to arrive at that. The decision as to the question of granting the postponement asked for will rest with the Home Government.

THE REPORTED ASSASSINATION OF THE AMEER.

(FROM OUR SPECIAL CORRESPONDENT.)

SIMLA, AUG. 23.

The Commissioner of Peshawur telegraphs that there is a rumour in the bazaar that the Ameer has been assassinated; but he can find no foundation for the report. The Government here disbelieve the rumour. No advices on the subject have been received from Afzul Khan, the Indian Government agent at Kabul.

(FROM OUR OWN CORRESPONDENT.)

SIMLA, AUG. 23.

Up to the time of telegraphing, no confirmation of the rumour regarding the assassination of the Ameer of Afghanistan has reached the Government of India. It is thought that if the report were true, news would have been received here.

MR. W. B. JONES, C. S. I.

Mr. W. B. Jones, C. S. I., Commissioner of the Central Provinces, and his Secretary, Mr. Fraser, left to-day on their return journey.

REPORTED DEATH OF THE LATE AMEER'S BROTHER.

The Resident in Turkish Arabia reports that Sharif Khan, younger brother of the Ameer Shere Ali, died suddenly at Baghdad on the 13th instant, apparently of heart-disease.

EXAMINATION FOR GOVERNMENT CLERKSHIPS.

A memorandum has been issued reminding candidates for Government clerkships that the Home Department cannot undertake to answer individual inquiries on matters that are sufficiently clear from the resolution of July last. When arithmetic and algebra are stated to be subjects of examination for the Upper division, it should be evident that the examination may extend over all that is generally taught under those subjects. Geometry of the straight line and circle should be understood to cover Euclid, books from I. to IV. and book VI., with the deductions arising thereout, and also the same range of subjects treated according to modern methods.

EDUCATION IN BRITISH BURMAH.

(FROM OUR OWN CORRESPONDENT.)

RANGOON, AUG. 23.

THE latest district reports state that cholera is subsiding in the Deccan; but the returns do not contain the figures for Khandesh, where the mortality has been greatest for several weeks past. For the other districts there were, during the week ended on the 21st instant, 152 deaths in Ahmednuggur, 124 in Thana, 115 in Sholapore, 89 in Poona, 56 in Kaira, 53 in Satara, 22 in Nasik, 18 in Belgaum.

A LIST of "rates of remuneration for persons employed as coolies or messengers by Government officers" appears in yesterday's *Bombay Government Gazette*.

ACCORDING to present arrangements, the various Government Departments at Simla will close soon after the 15th of November, and re-open in Calcutta at the end of that month; the Viceroy, as already announced, rejoining the head-quarters of Government on the 1st December.

IN addition to the remarks of H.E. the Governor at the opening of the Poona Fine Arts Exhibition given in our telegram, yesterday, we quote the following:—"One could wish that more natives had come forward, although some of the specimens we have now exposed to view, especially from the native females, deserve to hold a place in any competitive exhibition. However, it is hoped that the fact of their being so backward in coming forward this year to compete will be an easily surmountable difficulty in the future."

IT is said to be probable that Lord Ripon, after leaving Simla, may enjoy a brief period of needed relaxation in the shape of a trip to the Kulu Valley or elsewhere, not to Mussoorie as had been stated. It is also just possible, and no more, that His Excellency may pay a flying visit to Madras during the winter, as he did to Burma last year; but it is more probable that the pressure of public affairs of sorts may keep the Viceroy at Calcutta."

THERE is reason to believe that the proposals of the Government with regard to the Jurisdiction Bill may be announced some time during November, the *Pioneer* says, "so that the press and the public may have ample opportunity for their discussion in the interval before the meeting of the Legislative Council, which will dispose of it finally. For the moment the control of the matter has passed into the hands of the Secretary of State."

MR. GIBBS is expected back in India at the end of October, and thus the Government will not lose his assistance in the settlement of the important questions which are to engage its attention this cold weather. As Sir Auckland Colvin does not join until about the same date, the Viceregal Executive Council will for some time, on the departure of Sir Evelyn Baring, be reduced to four members. "As a rule, in the case of a body exercising the functions of an executive council," remarks the *Englishman*, "the smaller it is the more efficiently it is likely to work. In the present instance we must note, however, that only two members, Sir Steuart Bayley and Mr. T. C. Hope, of those remaining, have any practical experience of the civil administration of India, and that the most important departments of the Government, Finance and Foreign Affairs, are united under the direct control of a single mind."

THE Rajah of Bhinga some time since submitted to Government a scheme for the education of the sons of the native aristocracy of the North-West and Oudh. The Rajah has now substantially backed up his laudable object with a donation of twenty thousand rupees.

THE steamer City of Athens, which left Calcutta a few days ago, has been obliged to put back to Diamond Harbour, having met with a curious accident by which a small hole had been punched in her bottom, some ten feet below the water-line. It is supposed that, on leaving her anchor at Diamond Harbour and heaving her anchors, the fluke of one of the anchors punched the small hole in her bottom, just below the forepeak. Nothing seems to have been known of this, till the vessel was well out at sea, when the cook, happening one day to go into one of the coal bunkers, found the compartment, a watertight one, full of water. An examination of the vessel was made, and the hole discovered. She at once put back, and is now at Diamond Harbour, where she is to be examined by a party of marine experts.

THE following is the text of the Hon. Rivers Thompson's reference to the Bengal "race antagonism" in his speech at the opening of the Dear Hospital, Monghyr, to which we referred the other day:—

We live in days, ladies and gentlemen, when, from circumstances to which it is not necessary to allude, the divisions which separate the Europeans and natives stand out as more marked than they used to do. If it is not exactly the wide chasm which some people aver, there is, we all feel, a more or less formal reserve between us which did not formerly exist. Life in India runs in hundreds of different small channels, and the ultimate direction of all it may be difficult to determine. But, looking at the moral and material causes which are operating in both English and native society, the uniting force is, I believe—and I hope I am right—much stronger than the alienating force that separates us, and I am sure that the stronger will prevail in a union founded upon the right understanding of our mutual claims amongst each other. And when I look to the acts like this one, to the Monghyr munificent giving of his abundance to the people of the country of his adoption, without regard to colour or creed, in the pure spirit of catholic benevolence, I have a further confirmation of the fact that the deeds of love and kindness are not only good, but that the effect of such acts is reconciliation and a closer binding together of both peoples.

THE following news from Burmah is contained in a telegram to a Calcutta paper:—Notwithstanding recent measures, an attempt at dacoity has just been made in the Poozoondoung quarter of Rangoon, but was frustrated. Cholera has disappeared from the town of Akyab. It is reported that Mr. Bernard returns to Burmah in December.

THE *Madras Times* learns that Mr. Claude Vincent, the present Consulting Architect to Government, shortly proceeds, under orders from the Government of India, to Simla, in order to be present at a Committee of which he is a member, to assemble there early next month, to discuss the subject of light railways and steam tramways in the Madras Presidency, he having, during his last furlough, employed the greater portion of it on the Continent in specially studying this subject. One or two other officers, who have not been selected as yet, are also, it is understood, to be members of the Committee. Major Drake-Brockman, R.E., in charge of the Buckingham Canal, will, without prejudice to his own duties, conduct those of the Consulting Architect.

THE inquiry into the Daphne disaster closed on August 1 at Glasgow. Professor Robertson, on behalf of the firm, said that careful inquiry had shown that the total number on board at the launch was 186, of whom 62 were saved and 124 drowned; but Sir Edward Reed took formal police evidence that 194 were on board, of whom 71 were rescued. A test action has been begun in the Glasgow Sheriff's Court. Mrs. Morrison sues Messrs. Stephens for £1,000 for the loss of her husband.

ANOTHER outrage has been committed in a carriage of a train on the Saint Germains Railway. A gentleman travelling to that town was attacked by a number of men who were in the same compartment, and was robbed of his watch and £20. The victim became unconscious, but when the train reached Chatou he was able to give an alarm. Two of the robbers have been arrested.

GREAT excitement has been caused throughout the Dominion of Canada owing to a boundary dispute which has arisen between the authorities of Manitoba and the authorities of Ontario. It is being so angrily waged, and the Lieutenant-Governors of the two provinces have made such strong representations of possible outbreaks of violence and disorder, that the Dominion Government have stepped in, and will prevent the disputants coming to blows, and take means for definitely settling the boundary line.

THE parcels post came into operation throughout Great Britain and Ireland on August 1. Very complete arrangements were made for the working of the new department, and the public largely availed themselves of the facilities offered. At most of the chief towns the business on the first day was such as to put to a fair test the working of the new system.

MAJOR A. B. PORTMAN, Inspector-General of Registration and Stamps, is allowed furlough to England for seven months.

SURGEON-MAJOR W. MCCONAGHY, M.D., goes to Dharwar as Civil Surgeon in place of Surgeon-Major H. Cook, M.D., transferred to Poona; and Surgeon W. G. H. Henderson succeeds Dr. McConaghy at Karwar.

MR. F. J. A. HILL has been appointed to act as Extra Assistant Collector of Salt Revenue at Goa during the absence of Mr. N. R. Oliver on leave.

MR. COTGRAVE, 1st Assistant Superintendent of Police, Khandesh, has been granted leave for three months from the 20th inst.

MR. DOWNING, Indian Marine, acts as President of the Local Marine Board of Examiners during Captain Morland's absence on leave.

THE Rev. P. H. LeFebre is transferred from Deolali to officiate as Chaplain of Colaba, Bombay.

EXAMINATIONS for admission to the Subordinate Medical Department of the Bombay Presidency are to be held on the 10th September.

A RULE has been framed for insertion in the High Court Circulars, directing that "in addressing native gentlemen of distinction, the District Judges and their subordinates shall do so by letter, in such style as shall seem appropriate, rather than send summonses to them;" and in the case of Ruling Chiefs, "they may learn the proper style from the Political Agent or the Political Department of the Secretariat."

THE 96 deaths from cholera reported to have occurred within Bombay municipal limits during the week ended on Tuesday last are contrasted in the returns with one death from cholera in the corresponding week of last year, and a mean of fourteen deaths only from this disease in the third week of August during the last five years. Mazagon continues to be the most seriously affected district, 19 of the deaths reported during the week having occurred there; while 10 belong to Dhobie Talao, 8 to Cammatteepoora, 7 each to Khetwari and Girgaum, and 5 each to Dongri, Khumbarwara, Byculla, and Mahim. The divisions of the town that were altogether free, at least from cholera deaths, this week, were Middle and Lower Colaba, Northern Fort, Esplanade, Market, Mahalakshmi, 1st Nagpada, Parel, Sewree, Worli, and the Water Division. There was one European among the victims, 4 Native Christians, 2 Parsees, 13 Mahomedans, and the remaining 76 Hindus of low castes or outcastes.

TELEGRAPHIC WEATHER REPORT.

Ralli Brothers, Rs. 10; Mr. Rustomjee Khursetjee Cooper, Civil Engineer, Rs. 10; Mr. Dadabhoy Rustomjee Master, 11, Nathabhai-lane, Fort, Rs. 10.

BIRTHS AND DEATHS IN BOMBAY.—The total number of deaths registered during the week ended on Tuesday, 21st August, was 556 being 54 less than in the previous week, 183 more than the week ending 22nd August, 1882, and 100 more than the mean of the corresponding five weeks in the preceding five years. During the week 267 births were reported in the different districts of the city. The rate of mortality per 1,000 of the population per annum was 34·91, calculated on the increase of population since 1881. There were 90 deaths from remittent fever, being 13 less than in the previous week, and 24 more than in the same period last year. The deaths from diseases of the respiratory system, diarrhœa, and dysentery were last week 69, 39, and 18 respectively, as compared with 37, 20, and 13 in the same time last year. The deaths from cholera in the week under notice were 96 against 86 in the week previous, and 1 in the same time last year.

THEFTS.—Shaik Vazeer Shaik Adum was yesterday convicted by Mr. C. P. Cooper of stealing a hammer from a hardware shop near the Crawford Market. He was sentenced to one month's rigorous imprisonment.—Muchoo Goolab was yesterday convicted by Mr. Dosabhoy Framjee of stealing a black cloth coat, a pair of black cloth trousers, a towel, and two knives, respectively the property of Theodore Hayter, a ticket collector in the employ of the G. I. P. Railway Company. He was sentenced to three months' rigorous imprisonment.

HEALTH OF POONA.—We are sorry to say that cholera still prevails, though in a milder form. The few cases lately reported are classed under the head of "choleraic diarrhœa," some of which proved fatal. Ague, fever, and cough are also very prevalent in the city just now.—*Poona Observer.*

THE POONA ELOPEMENT CASE.—This case was resumed on Wednesday before Mr. C. W. Richardson, Magistrate, E. C. The complainant (husband of the woman) and his wife (Bhageerutee, the woman that eloped) were cross-examined by the vakils for the accused. The facts elicited were that the woman had gone to the theatre with the accused at his own expense, that she was accompanied by three of her children to the theatre, that some days before the elopement the accused had given a "khana" at his own expense, that her husband had partaken of the feast, and knew that it was given by the accused Ghessadee. It was also ascertained that the accused was waiting on Mr. Kalls Hood to receive the woman on the night when she eloped from her husband.—*Deccan Herald.*

A CO-ADJUTOR BISHOP FOR PONDICHERRY.—We are informed that owing to the age and increasing infirmities of the Right Reverend Dr. Laounenan, Bishop and Vicar Apostolic of Pondicherry, His Lordship applied to Rome, and succeeded in obtaining the sanction of the Holy See, to the nomination of the Reverend Father Gandy, as Co-Adjuto, Bishop, with right of succession when the See becomes vacant. The sanction was accorded more than two months ago, and the coming consecration of the Co-adjutor Bishop elect will take place at Pondicherry, on the 9th September next. The prelates of the adjoining vicariates, the Right Rev. Dr. J. Colgan, Bishop of Madras, Bishop Canoz of Trichinopoly, Bishop Coadou of Bangalore, Bishop Bardou of Coimbatore, and Bishop Caprotti of Hyderabad, are expected to take part in the ceremony. Father Gandy, the Bishop elect, has served in the Pondicherry Vicariate for more than twenty years. His nomination is an electional one, inasmuch as most of the priests of the Vicariate were found lying in the vicinity of the boxes. The Catholic Church, however, does not recognise such electional nomination, but the Holy See has yielded to the general wish expressed by the Bishop and Clergy. Father Gandy is a member of the Society of the Foreign Missions of Lyons and Paris, a body which is doing such exceptional and devoted service in the cause of religion in India and China. The Chinese branch alone, of the Society, numbers twenty-two Missions; in India they have three.—*Madras Mail.*

...1883, has announced his intention to ...

The construction of the first section of the New Drainage, Sewerage, and Outfall works, sanctioned by the Corporation in August, 1878, is virtually complete, and the various parts in good working order, but I have not yet taken over the pipe sewers from Messrs. Dadabhoy Nusserwanjee & Co., because since the new Pumping Station has been at work, and the actual connection of the pipe sewers with the Main Sewer could be made, I have insisted upon a final inspection of every line, and a proof that it is clear and perfect; and that inspection is not yet complete. The little corrections and final touches required are but small as far as the inspection has gone, and I could finish them in a few weeks of fair weather if any extreme urgency necessitate my taking them into my own hands, but as the house connections are not made there is no need to take any stringent measure of such a nature.

The small works (*viz.*, painting, cleaning, and removal of mortar droppings) on the Main Sewer, which were left undone by the contractors, and for which a sum of Rs. 3,396 was retained out of their balance, are finished except as regards a portion of the sewer between Clerk-road and Love-grove.

With regard to the amount which has been expended to the present time, I have obtained from the Controller the following statement :—

Section XIII.

NEW DRAINAGE WORKS LOAN ACCOUNT, 1878.

	Expenditure up to 23rd July, 1883. Rs.	a.	p.
1 Main Sewer	4,93,261	13	2
2 Pipe Sewer	2,53,328	3	7
3 Outfall Sewer	2,55,766	10	0
4 New Pumping Machinery	87,528	9	6
5 New Engine House	87,678	14	7
6 Kamatipura Drainage	61,878	7	6
7 Clerk-road Ovoid Sewer	27,069	13	10
8 Government Commission Charges	5,711	15	9
9 Preliminary Expenses	13,429	6	5
10 Departmental Works	11,781	14	3
11 Compensation for Land	18,831	11	1
12 Proportion of Repairs to Roads (opened for the work)	34,372	14	7
13 Miscellaneous Charges	22,127	15	7
14 Establishment	1,45,000	0	0
15 Contingencies	21,734	12	10
Rupees...	15,35,823	2	8

It will be seen that although the expenditure on the Kamatipura Sewerage works and the Ovoid Sewer in Clerk-road (amounting altogether to Rs. 91,948) has been debited to the 17th lakh loan, yet there is still a considerable balance available, and I think that even after the accounts are fully made up thus will still be a good surplus.

Considering the magnitude and nature of the work, and the long distances over which it extends, it cannot be contended that there has been any inordinate delay, though certain circumstances which occurred during the progress of the works retarded their completion beyond the time when it was hoped they might be out of hand.

The damage which happened to the Outfall works, through the unusually severe weather which attacked them before they had time to set, was one of these occurrences; and the repairs, which could be undertaken only for very limited periods during favourable tides, unavoidably retarded their completion until the last fair season.

The contractors for the foundations of the engine-house, and also the contractors for the superstructure of the Pumping Station and for other minor works, were both behind their contract time, and the contractors for the engines and pumps were longer about their work than had been anticipated. As is often, if not generally, the case with machinery, that at the new Pumping Station did not at first work satisfactorily and numerous alterations and variations had to be made before it would go well. It was not till March last that I could depend upon being able to work the pumps continuously.

Since that date, the house connections or communications might have been put in hand and allowed to discharge sewage into the new sewers, but it must of course be apparent that until the pumps could be depended upon to pump out sewage from the sewers, no sewage could have been allowed to pass into them, and as the house communications, as soon as it is made, must be allowed to carry sewage (because the discharge of waste water from a house cannot be stopped even for a single day, and any temporary provisions must have been exceedingly inconvenient and heavily expensive), the house communications could not have been taken in hand until that time.

In November, 1879, (in my No. 2502, of the 11th November, 1879) I laid before the Commissioner my views regarding taking steps towards providing house connections, and in my No. 1285, of the 26th April, 1880, I recommended that a stock of pipes and fittings (both of cast iron and stoneware) should be ordered out from England, to save time. On the 27th August, 1880, the Commissioner communicated to me that a staff for the survey and estimate of house connections had been sanctioned, and on 8th December, 1881 (as communicated to me under your No. 3205, dated 22nd June 1883), the Corporation sanctioned the estimate, provided that detailed plans and estimates were submitted to the Corporation for final sanction before any expenditure were incurred.

The question then arose of the legality, under the present Municipal Act, of expending public money upon these works, and of requiring house owners to do them or allow them to be done, and as an amendment of the Act was contemplated it was intended that ample powers should be obtained. It was thought, then, that the amendments to the Act would be passed within a short time.

Your No. 9310, dated 14th November, 1882, informed me that the Corporation had resolved, with some exceptions, to pay for the entire cost of the construction and maintenance of house connections, but still the amendments to the Act had not (and ret) been passed.

time the work in Kamatipura had so far as to admit of privies being fitted up, experiment required by the Corporation d out, and is still working, with great

tinted out in my No. 1043, of the 27th 83, and again in my No. 601 of 3rd e difficulties which will be presented the ablution water, and the overflow il baskets unless the new system of ied out, and have shown that pro- made to take those matters into s to prevent its running on to the sweeper's passages, and perpetuat- ing, with but little improvement, the present state of affairs. To this the Commissioner has very naturally demurred, on the ground that there would be incurred a considerable expense which would be absolutely thrown away when the new system came to be adopted.

In my No. 1703 of the 22nd June, 1883, I have asked to be allowed to fit up two sweepers' passages in Kamatipura, one with the privies and nahanis completely fitted, and the other with only nahanis fitted (the privies remaining, in their present state), in order that the two effects may be compared.

As stated in the Commissioner's No. 1035 of 23rd June, 1883, "It is hoped that the necessary amendments to the Act will be passed before long," and in the meantime I have obtained your sanction (No. 3825 of 7th July, 1883) to call for tenders for the supply of cast iron nahani pipes and fittings, the drawings for which are ready, and the specification and conditions of contract have, at your request, been sent to the solicitors for their approval.

The necessary drawings, specification, and conditions of contract for putting up the pipes and fittings at the houses are also ready.

The contrivances devised for preventing the admission of sewer air into dwellings and streets depend for their efficiency upon copious ventilation. On the main sewer at about every 100 yards it is intended to erect a shaft ventilator, partly of cast iron and partly of zinc, with a sectional area of 36 square inches, carried up above the roofs of the houses. The distances apart will vary according to the positions of the manholes, and the proximity of convenient buildings against which to fix the ventilating shafts.

The sewer will be further very extensively, though incidentally, ventilated by a 2½ iron pipe at every sweeper's passage or other communication; the ventilation of the sewer in these cases will be incidental, because the pipe is primarily intended to prevent any possibility of pressure of sewer air being brought to bear upon the stoneware siphons and of the sewer air being forced through.

The trunk pipe sewers will be ventilated by shafts and pipes in a similar manner.

Every house branch pipe will be ventilated by a pipe running up above the roof at the first and last communication on the line.

Every discharge from a building will be protected even from the ventilated house branch pipe, by a siphon either attached to the wall or in the form of a gully trap at the surface of the ground, as circumstances may dictate.

Every discharge from a building will be not really a connection, but a communication open to the air, and generally open not only in one place but in several places.

Again, no discharge will be exactly vertical over the place from which sewer air would be discharged, if we could conceive that, notwithstanding the efficient ventilation described, it could force the siphons and still refuse to escape through the open communications, it would yet be free to escape through a vertical open-ended pipe without taking a turn in order to enter the buildings.

The main sewer can be, and has experimentally been, flushed by damming up the sewage and suddenly releasing it, the operation being repeated length by length. The accumulation can be augmented and the period of damming up shortened by the admission of any quantity of sea-water desired. Penstocks or sluice doors have been provided at the sewer head at Carnac-bunder admitting sea-water at pleasure. ...uer for

In the most important of the ... which sewage will be abs... trunk pipe sewers that no flushing will be ...uired, I am of opinion itself will maint... required, as the sewage at which the... a constant flush, the grade make th... are laid being sufficiently steep to ...em self-cleansing.

Where, however, it may be found that the sewage is not sufficient to fill the pipes to one-half their area, flushing must be resorted to. In these cases the sewage can be dammed back and supplemented by water brought to the required spot by water-carts specially designed. The carts can be filled either with fresh water from a standpipe or with sea-water obtained at a slipway.

House branch pipes may be flushed in a similar manner, the carts being hand carts and necessarily smaller. Some sweepers' passages, however, are too narrow, too circuitous, and too long to be treated in this manner, and for these cisterns with annular siphons should be provided and regulated to discharge about every three or four days.

From my experience of the new privies at the Municipal Office and in Kamatipura, I feel confident that if they are generally adopted but very little flushing, indeed, particularly of house branch pipes, will be required. The privies, being provided with waste-prevention cisterns (those with siphon pipe are the best), produce practically all the necessary conditions and results of an efficient flush. The body of water is small in each case, but it is liberated suddenly with great force, and at numerous positions at short distances. This takes place, too, at frequent intervals every day. A sum of Rs. 6,100 has been taken in the estimate for providing and fixing the cisterns with automatic annular siphons referred to in the next-but-one preceding para; but only experience of the work can show the exact number that may be required.

The cost of these must, in my opinion, be borne by the Municipality, because I fear it could not be otherwise equitably divided amongst the house owners.

There will be, in round numbers, 3,500 separate connections with the sewer, and if it be assumed, as a liberal allowance, that each connection requires to be flushed in one way or another, once in every three days, and if 150 gallons be reckoned upon for each flush, the quantity of water required per diem will be 1,75,000 gallons, or 93-100th gallon per head, the population of the whole district being about 1,87,000.

I cannot consider that this small reduction from the present water-supply, or rather diversion from the present uses of the water-supply, will make the supply inadequate for the purposes to which it is now applied.

It is impossible to state at present what establishment may be required for maintaining and working the sewers and their tributaries. It must depend on some experience of working, and this as yet is altogether wanting.

The system, and the general remarks which I have made, will apply equally to Kamatipura, and as regards matters relating particularly to Kamatipura, I beg to refer to my report No. 2273,* of the 23rd July, 1883, which has already been forwarded to you.—I have, &c.

RIENZI WALTON, M.I.C.E.,
Executive Engineer, Municipality.

SIR EVELYN BARING.

THE Calcutta Literary Society has presented Sir Evelyn Baring, one of its members, with the following valedictory address, dated August 15:—

"Hon'ble Sir,—We, the undersigned members of the Calcutta Literary Society, desire, on the eve of your departure from this country, to approach you with this expression of our esteem and regard for your meritorious and successful administration as Finance Minister of India. We avow with one accord our deep sense and appreciation of your personal qualities and merits, which have endeared you to all who have had the pleasure of your acquaintance. Moreover, your kindness, courtesy, unfeigned friendship and desire to do good to all, consistently with your high position and duties, joined with your free intercourse with the native society and deep interest in their welfare, have no less heightened the value of your services as a Finance Minister than as a friend and well-wisher of the people. We trust that you will kindly remember India and her best interests in every land you may sojourn or choose for residence. In conclusion, we wish you a safe voyage, and pray that the Author of All Good will bless you with long life, prosperity, and happiness."—*Statesman.*

EDUCATION.—A deputation allowance of Rs. 400 per mensem has been sanctioned to Mr. G. Bellett, M. A., Officiating Director of Public Instruction, in addition to the grade pay of his rank as an educational officer.—*Indian Daily News.*

SUDDEN DEATH OF A SHIP CAPTAIN.—On Saturday morning Captain Spain, Commander of the steam tug Enterprize, died suddenly off Saugor boads. From certain letters which the deceased had written to his employers, Messrs. Apcar and Company, the death of Captain Spain was communicated to the Bengal Police, who were requested to ascertain what truth there was in certain allegations made by him in those letters, that he had been drugged by one of the officers. The Police Surgeon was communicated with, and, after holding a *post mortem* examination, was of opinion that the immediate cause of death was Bright's disease in an aggravated form. However, to set all doubts at rest, the Chemical Examiner to Government has been instructed to analyse portions of the deceased's viscera and kidneys, and state whether any trace of poison can be found in them. Deceased was an old man over sixty years of age.—*Englishman.*

THE CALCUTTA EXHIBITION.—The display of Burmese gold and silver-work at the forthcoming Calcutta Exhibition will give those who have not visited the province, a sight of the quaint workmanship of the Burmese gold and silversmiths, and of their capabilities of turning out very pretty articles, although the workmanship is somewhat rough. There would, we believe, be a demand in Europe for these particular wares as well as for Burmese wood and ivory carvings. We have seen knife-handles exquisitely carved, but the way to the European eye, from the introduction of worthless bits of coloured glass into the really attractive work of the native artist. The steam navigation companies should issue return tickets at reduced rates during the exhibition months, to encourage the Burmese and their families to pay Calcutta a visit. The present rates of cabin passages for a three-days' sea-trip from Rangoon to Calcutta are almost prohibitive. A reduction is made on return passages, but a very small one, and as it is on the cargo we believe that the profit chiefly is made in the short voyages, travelling would be greatly encouraged, if owners would reduce their rates for cabin passages to about £1 per day. The present rate is almost three times this.—*Statesman.*

MADRAS.

TUMBOLY RIOT: A MARE'S NEST.—On Saturday, Cochin was in a state of commotion owing to telegrams received by the local Joint-Magistrate and Inspector of Police, informing them that a most aggravated riot with robbery had been committed by some natives at Tumboly, and that one of the parties concerned was in a moribund state from grievous injuries received. The telegrams further called upon them to repair to the spot to hold an inquiry into the matters. The Joint-Magistrate thereupon directed the 2nd Class Magistrate to proceed at once to the scene of the crime, and this officer had to go all the way by backwater to Alleppy and thence proceed to Tumboly. On reaching Tumboly, very much excited as he must have been, he was astonished to see that, instead of finding the matter as telegraphed, he was unwittingly caught in a *mare's nest*, most skilfully laid by some mischievous person. On enquiry it was discoved that, beyond a palrty assault committed by some fishermen under the influence of drink, nothing serious had ever taken place as communicated by the telegrams.—*Western Star.*

SCENE AT THE SALVATION BARRACKS.—A correspondent writes:—On Sunday night a painful scene was witnessed at the Salvation Barracks, Broadway. After the usual meeting, a watch-night service was held for the week, at which Captains Usher and Roberts officiated. Only those who were "saved," were permitted to be present at this service. Several young women who took part in the proceedings worked themselves up to such a pitch of religious enthusiasm that they went off into hysterics, and the officers of the army, instead of trying to calm them, excited them more by their shouts of "Hallelujah," "Amen," &c. The shrieks and cries of the saved were so appalling that the residents about the place were in a regular state of alarm.—*Madras Times.*

THE "BLOCK SYSTEM" ON THE MADRAS RAILWAY.—Notwithstanding the opposition of the Board of Directors in England, the introduction of the "Block system" on the Madras railway has, we hear, been finally decided on by Government, and will soon be an accomplished fact. We believe that the system is to be worked at a reduced cost, and that the railway officers concerned have already submitted plans for carrying out the intentions of Government in such a way as to secure all interests in the best manner possible under the circumstances.—*Ibid.*

THE PROPOSED BANGALORE HUNT CLUB.—We are sorry to learn that the movement recently set on foot to get up a Hunt Club in Bangalore, has fallen through. Since the fate of the old Mysore Commission was sealed, there have been but few public men of sporting proclivities and large purses to patronise and support such institutions, a fact greatly to be deplored. The decline of the Bangalore races is another instance of the truth of our assertion. In the old days Bangalore could boast of a flourishing Hunt Club, and a splendid pack of hounds, and with such a magnificent country around for morning "runs," our readers may imagine what capital sport was enjoyed. The last Honorary Secretary of the Bangalore Hunt was, if we are not mistaken, Captain Shafto, then Aide-de-Camp to Genl. Elmhirst, Commanding the Mysore Division. But in 1877 the Hunt collapsed, and the hounds were sold to the Maharajah of Mysore, who now possesses one of the best packs in the country. It is a pity the sport cannot be renewed here. The Lancers boast of so many ardent sportsmen among their officers, as also do the "Light Bobs," that we yet entertain hopes of the revival of the old Bangalore Hunt.—*Bangalore Post.*

ACCIDENT AT MUSSOORIE.—A sad accident at Mussoorie occurred on Friday evening to a young girl, only seven years of age, the daughter of Mrs. Reinhold, of Agra, residing at Willow Bank. The unfortunate girl was out for her usual walk round the Camel's Back-road at a point of a steep precipice, nearly under Fern Hill, and, somehow, fell over the khud.—*Himalaya Chronicle.*

Holloway's Ointment and Pills.—Coughs, Influenza.—The soothing properties of these medicaments render them well worthy of trial in all diseases of the respiratory organs. In common colds and influenza the Pills, taken internally, and the Ointment rubbed over the chest and throat, are exceedingly efficacious. When influenza is epidemic, this treatment is the easiest, safest, and surest. Holloway's Pills, purify the blood, remove all obstacles to its free circulation through the lungs, relieve the over-gorged air tubes, and render respiration free, without reducing the strength, irritating the nerves, or depressing the spirits; such are the ready means of saving suffering when anyone is afflicted with cold, coughs, bronchitis, and other chest complaints, by which so many persons are seriously and permanently afflicted in most countries
